Contents

Volume 32

Number 1

A theory of reflections for traceable radiation thermometry 1
P. Saunders and D. R. White

Analysis and control of electrical insulation leakage in platinum resistance thermometers up to 1064 °C 11
R. J. Berry

Operation and data analysis in the LASSO experiment 27
P. Fridelance and C. Veillet

Trilateral international type-N ANA comparison exercise 35
J. P. Ide, K. Hilty and J. P. M. de Vreede

Long-term stability of measurements in the ^{60}Co field at the BIPM 43
A.-M. Perroche and M. Boutillon

Short Communication

Two-way time transfer experiment via the Horizon satellite 51
E. L. Gurevich

International Reports

News from the BIPM 55
T. J. Quinn

The Asia/Pacific Metrology Programme 61
J.-C. Park and B. D. Inglis

Current activities of EUROMET 63
K. Carneiro and J. C. Petersen

Number 2

On the thermodynamic accuracy of the ITS-90: platinum resistance thermometry below 273 K 71
J. V. Nicholas

European comparison of short gauge block measurement by interferometry 79
B. G. Vaucher, R. Thalmann and H. Baechler

Inconsistency in the ITS-90 and the triple point of mercury 87
K. D. Hill

A simple external iodine stabilizer applied to 633 nm, 612 nm and 543 nm He-Ne lasers 95
E. Jaatinen and N. Brown

The chemical preparation and characterization of specimens for "absolute" measurements of the molar mass of an element, exemplified by silicon, for redeterminations of the Avogadro constant 103
P. De Bièvre, G. Lenaers, T. J. Murphy, H. S. Pieser and S. Valkiers

Comparative calculations of the volume of nearly perfect spheres using profilometer data 111
J. Ha, W. Giardini and G. Zosi

Determination of the fine-structure constant by a precise measurement of h/m_n 117
E. Krüger, W. Nistler and W. Weirauch

Short Communication

Observation of Al_2O_3 melting and freezing plateaus using a cavity-type tungsten crucible 129
H. Sakate, F. Sakuma and A. Ono

Letter to the Editor

Note on the origins of IEC 164 133
B. W. Petley

Number 3

Foreword – Special issue, ICAG94 135
I. Marson

Fourth International Comparison of Absolute Gravimeters 137
I. Marson, J. E. Faller, G. Cerutti, P. De Maria, J.-M. Chartier, L. Robertsson, L. Vitushkin, J. Friederich, K. Krauterbluth, D. Stizza, J. Liard, C. Gagnon, A. Lothhammer, H. Wilmes, J. Makinen, M. Murakami, F. Rehren, M. Schnull, D. Ruess and G. S. Sasagawa

Microgravimetric measurements at the 1994 International Comparison of Absolute Gravimeters 145
M. Becker, L. Balestri, R. Bartell, G. Berrino, S. Bonvalot, G. Csapó, M. Diament, M. D'Errico, C. Gerstenecker, C. Gagnon, P. Jousset, A. Kopaev, J. Liard, I. Marson, B. Meurers, I. Nowak, S. Nakai, F. Rehren, B. Richter, M. Schnüll, A. Somerhausen, W. Spita, G. Szatmári, M. Van Ruymbeke, H.-G. Wenzel, H. Wilmes, M. Zucchi and W. Zürn

Absolute gravity observations on BIPM site A3 during the 1989 and 1994 International Comparisons of Absolute Gravimeters 153
J. Liard, C. Gagnon and N. Courtier

A new generation of absolute gravimeters 159
T. M. Niebauer, G. S. Sasagawa, J. E. Faller, R. Hilt and F. Klopping

Absolute gravimeters: status report on the use of iodine-stabilized He-Ne lasers at $\lambda = 633$ nm 181
J.-M. Chartier, A. Chartier, J. Labot and M. Winters

Analysis of data from the 1994 International Comparison of Absolute Gravimeters with a single computational protocol 185
G. S. Sasagawa, F. Klopping and T. M. vanDam

Vertical gradient and datum height corrections to absolute gravimeter data and the effect of structured fringe residuals 193
K. Charles and R. Hipkin

A new approach to absolute gravimeter analysis 201
V. D. Nagornyi

Calibration of gravimeters with the VRR 8601 calibration platform 209
M. Van Ruymbeke, A. Somerhausen and N. Grammatica

The Frankfurt calibration system for relative gravimeters 217
B. Richter, H. Wilmes and I. Nowak

Apparatus for moving mass calibration of LaCoste-Romberg feedback gravimeters 225
G. Csapó and G. Szatmári

Performance of two Scintrex CG3M instruments at the fourth International Comparison of Absolute Gravimeters 231
P. Jousset, M. Van Ruymbeke, S. Bonvalot and M. Diament

Number 4

UTC(INPL) – a virtual time scale 245
A. Lepek, A. Shenhar and D. W. Allan

On the propagation of the uncertainty at the triple point of water, associated with the calibration of SPRTs according to the ITS-90: a case study 253
P. Bloembergen

Modelling of the effective emissivity of a graphite tube black body 259
M. J. Ballico

A new precise determination of Newton's gravitational constant 267
W. Michaelis, H. Haars and R. Augustin

A pressurized mercury column up to 300 MPa 277
G. J. F. Holman and C. A. ten Seldam

Concerning the consistency of fixed points of the temperature scale 295
J. Ancsin

Progress in stabilization of the He-Ne/$^{127}I_2$ wavelength standard at 633 nm and results of an international comparison between the PTB and the UME 301
M. Erin, B. Karaböce, I. Malinovsky, A. Titov, H. Uğur, H. Darnedde and F. Riehle

Short Communication

Sans dimension ou de dimension un ? 311
P. Giacomo

Letter to the Editor

Note sur "Traceability of Mass Standards among Thirty-nine Member States of the Convention du Mètre" 315
G. Girard

International Comparisons

EUROMET Project 234 317

EUROMET Project 290 319

EUROMET Project 229 321

GT-RF 86-6 323

Book Reviews 325

Il y a 200 ans Lavoisier,
Actes de colloque bicentenaire de Lavoisier, mai 1994
C. Jacques

Particle Counting in Radioactivity Measurements,
ICRU Report 52
J. M. R. Hutchinson

Errata 331

Number 5

Determination of the absolute density of water at 16 °C and 0,101 325 MPa 333
R. Masui, K. Fujii and M. Takenaka

Comparison between the He-Ne laser wavelength standards at 633 nm from the UME and the BIPM 363
M. Erin, I. Malinovsky, A. Titov, A. Chartier and J.-M. Chartier

Calibration of inductive voltage dividers at extremely low frequencies 367
D. Tarach and G. Trenkler

Realization of the ITS-90 above 962 °C with a photodiode-array radiation thermometer 371
M. Battuello, T. Ricolfi and L. Wang

International comparison of stabilized He-Ne lasers by the saturated absorption of $^{127}I_2$ at $\lambda \approx 633$ nm involving the CEM (Spain), the IPQ (Portugal) and the BIPM 379
E. Prieto, Mª. Mar Pérez, Dulce Mª. González, F. Saraiva, A. Chartier and J.-M. Chartier

Comparison of quantum Hall effect resistance standards of the OFMET and the BIPM 385
F. Delahaye, T. J. Witt, B. Jeckelmann and B. Jeanneret

Short Communications

Pressure coefficients of 1 Ω Thomas-type resistance standards 389
H. Karlsson and T. Sørsdal

Correction of the gas-thermometry scale of the VNIIFTRI in the range 2,5 K to 308 K 393
D. N. Astrov, L. B. Belyansky and Y. A. Dedikov

Letter to the Editor

Chappuis' experiments and the "Échelle Normale" 397
H. Watanabe

EUROMET Project 273 403

EUROMET Project 219A 405

EUROMET Project 219B 407

Number 6

Foreword – Conference issue, NEWRAD '94 409
B. Wende

Radiometric Sources

Black-body radiometry 411
V. I. Sapritsky

Radiometry with synchrotron radiation 419
B. Wende

A method of realizing spectral-radiance and irradiance scales based on comparison of synchrotron and high-temperature black-body radiation 425
R. P. Madden, T. R. O'Brian, A. C. Parr, R. D. Saunders and V. I. Sapritsky

The characterization of a high-temperature black body as the basis for the NPL spectral-irradiance scale 431
M. White, N. P. Fox, V. E. Ralph and N. J. Harrison

Spectral-irradiance scale based on radiometric black-body temperature measurements 435
P. Sperfeld, K.-H. Raatz, B. Nawo, W. Möller and J. Metzdorf

The double-heatpipe black body: a high-accuracy standard source of spectral irradiance for measurements of $T - T_{90}$ 441
M. Stock, J. Fischer, R. Friedrich, H. J. Jung and B. Wende

Direct comparison of copper and gold freezing-point black-body primary standards from the NRLM and the NIST 445
T. R. O'Brian, B. Carol Johnson and F. Sakuma

Results of a NIST/VNIIOFI comparison of spectral-radiance measurements 449
R. D. Saunders, C. E. Gibson, K. D. Mielenz, V. I. Sapritsky, K. A. Sudarev, B. B. Khlevnoy, S. N. Mekhontsev and G. D. Harchenko

Realization of the lumen on the basis of a large-aperture high-temperature black body 455
V. I. Sapritsky and R. I. Stolyarevskaya

The electron storage ring BESSY as a primary standard source – a radiometric comparison with a cryogenic electrical substitution radiometer in the visible 459
R. Thornagel, J. Fischer, R. Friedrich, M. Stock, G. Ulm and B. Wende

Detectors

Results of an international comparison of spectral responsivity of silicon photodetectors 463
R. Köhler, R. Goebel and R. Pello

A four-element transmission trap detector 469
J. L. Gardner

Comparison of filter radiometer spectral responsivity with the NIST spectral-irradiance and illuminance scales 473
B. K. Tsai, B. Carol Johnson, R. D. Saunders and C. L. Cromer

Absolute detector quantum-efficiency measurements using correlated photons 479
A. L. Migdall, R. U. Datla, A. Sergienko, J. S. Orszak and Y. H. Shih

Polarization characteristics of semiconductor photodiodes 485
T. Saito, M. Yuri and H. Onuki

The radiation entrance window of pn junction detectors 491
R. Hartmann, P. Lechner, L. Strüder, F. Scholze and G. Ulm

New data-reduction method in detector-based spectral-irradiance measurements 495
G. Andor

Extension of a silicon-based detector spectral-responsivity scale into the ultraviolet 497
A. Bittar

Biphoton fields for quantum-efficiency measurements 501
S. Castelletto, A. Godone, C. Novero and M. L. Rastello

Evaluation of solid-state detectors for ultraviolet radiometric applications 505
N. M. Durant and N. P. Fox

Accurate calibration of filter radiometers against a cryogenic radiometer using a trap detector 509
R. Friedrich, J. Fischer and M. Stock

Some effects of low-power ultraviolet radiation on silicon photodiodes 515
R. Goebel, R. Köhler and R. Pello

Towards a detector-based spectral-radiance scale in the near-ultraviolet 519
W. S. Hartree, N. P. Fox and R. P. Lambe

Improved comparison of the World Radiometric Reference and the SI radiometric scale 523
J. Romero, N. P. Fox and C. Fröhlich

Detector calibration in the wavelength region 10 nm to 100 nm based on a windowless rare gas ionization chamber 525
T. Saito and H. Onuki

A Fourier-transform spectrometer for spectral-irradiance comparisons 531
L. Werner

Cryogenic Radiometry

Radiometry with cryogenic radiometers and semiconductor photodiodes 535
N. P. Fox

PTB primary standard for optical radiant power: transfer-optimized facility in the clean-room centre 545
K. D. Stock and H. Hofer

First results of measurements with the BIPM cryogenic radiometer and comparison with the INM cryogenic radiometer 551
R. Köhler, R. Goebel, R. Pello, O. Touayar and J. Bastie

An absolute cryogenic radiometer for laser calibration and characterization of photodetectors 557
S. P. Morozova, V. A. Konovodchenko, V. I. Sapritsky, B. E. Lisiansky, P. A. Morozov, U. A. Melenevsky and A. G. Petic

Indirect comparison of cryogenic radiometers from the INM (France) and the VTT (Finland) with a QED-200 from the VSL (Netherlands) 561
O. Touayar, H. Reyn, J. Bastie and T. Varpula

Monochromator-based cryogenic radiometry at the NRC 565
L. P. Boivin and K. Gibb

First results with the new PTB cryogenic radiometer for the vacuum-ultraviolet spectral range 571
A. Lau-Främbs, U. Kroth, H. Rabus, E. Tegeler, G. Ulm and B. Wende

Reduction of the background thermal radiation input to a cryogenic radiometer for the measurement of a spectrally filtered continuum source 575
D. H. Nettleton

A mechanically cooled portable cryogenic radiometer 581
N. P. Fox, P. R. Haycocks, J. E. Martin and I. Ul-Haq

Mode-locked lasers for high-accuracy radiometry 585
T. R. Gentile and C. L. Cromer

Air-ultraviolet and Vacuum-ultraviolet Radiometry

Determination of the spectral radiance of transfer standards in the spectral range 110 nm to 400 nm using BESSY as a primary source standard 589
Fu Lei, W. Paustian and E. Tegeler

Detectors for the measurement of intense ultraviolet-C radiation 593
W. Heering

VNIIOFI secondary-standard sources and detectors of vacuum-ultraviolet and ultraviolet radiation 597
S. I. Anevsky, A. E. Vernyi, V. V. Korneev, O. A. Minaeva, O. Yu. Morozov and V. B. Khromchenko

Ageing of materials under intense ultraviolet radiation 601
D. R. Gibbs, F. J. Duncan, R. P. Lambe and T. M. Goodman

Infrared Radiometry

Solid-state detectors for infrared radiometry 609
N. P. Fox, T. R. Prior, E. Theocharous and S. N. Mekhontsev

Some problems in realizing an infrared spectral-irradiance scale from 1500 nm to 2400 nm at the NRC 615
A. A. Gaertner and L. P. Boivin

NIST Low-background Infrared spectral calibration facility 621
S. R. Lorentz, S. C. Ebner, J. H. Walker and R. U. Datla

Characterization of argon arc source in the infrared 625
J. M. Bridges and A. L. Migdall

Space-based Instruments

Calibration of the Solar Ultraviolet Spectral Irradiance Monitor (SUSIM) on ATLAS-2 629
M. D. Andrews and M. E. VanHoosier

The SSBUV experiment wavelength scale and stability: 1988 to 1994 633
R. P. Cebula, E. Hilsenrath, P. W. DeCamp, K. Laamann, S. Janz and K. McCullough

Uncertainties in radiance calibrations of backscatter ultraviolet (BUV) instruments 637
S. Janz, E. Hilsenrath, J. Butler, D. F. Heath and R. P. Cebula

The pn-CCD as focal plane detector for the XMM satellite mission 643
H. Bräuninger, H. Böttcher, W. Burkert, D. Carathanassis, N. Findeis, G. Hagl, G. Hartner, D. Hauff, M. Hengmith, H. Hippmann, P. Holl, E. Kastelic, J. Kemmer, E. Kendziorra, W. Kink, J. Krämer, P. Lechner, G. Lutz, D. Maurer, N. Meidinger, G. Metzner, M. Mohan, S. Müller, P. Predehl, C. Reppin, R. Richter, J. Schaumberger, G. Schwaab, H. Seitz, R. Sigl, H. Soltau, R. Staubert, L. Strüder, J. Trümper and C. von Zanthier

The Coronal Diagnostic Spectrometer for the Solar and Heliospheric Observatory: experiment description and calibration 647
R. A. Harrison, B. J. Kent, E. C. Sawyer, J. Hollandt, M. Kühne, W. Paustian, B. Wende and M. C. E. Huber

Space degradation of SOVA sunphotometers on EURECA 653
Ch. Wehrli, C. Fröhlich and J. Romero

Ground-based calibration facility for the Scanner for Radiation Budget instrument in the solar spectrum domain 657
J. Mueller, R. Stuhlmann, R. Becker, E. Raschke, J.-L. Monge and P. Burkert

Solar ultraviolet spectral-irradiance observations from the SUSIM-UARS experiment 661
G. E. Brueckner, L. E. Floyd, P. A. Lund, D. K. Prinz and M. E. VanHoosier

Diffusing screen for on-board radiometric calibration of the stereo-spectral-imaging system ARGUS for Mars 94/96 mission 667
S. P. Morozova, V. I. Sapritsky, P. A. Morozov, A.V. Novitsky, B. B. Khlevnoy, B. E. Lisiansky, V. I. Tarnopolsky and A. V. Belousov

Calibration of radiometers for remote sensing of the Earth's atmosphere from space 671
U. Veismann

Radiometric Aspects of Photometry

Realization of the candela from a partial filtering $V(\lambda)$ detector traceable to a cryogenic radiometer 675
J. Campos, A. Corróns, A. Pons and P. Corredera

Comparison of luminous-intensity scales based on trap detectors and incandescent lamps 681
L. Liedquist, E. Ikonen, P. Kärhä and H. Fagerlund

Goniophotometry: new calibration method and instrument design 685
G. Sauter

Radiometric realization of the candela with a trap detector 689
E. Ikonen, P. Kärhä, A. Lassila, F. Manoochehri, H. Fagerlund and L. Liedquist

Characterization of modified FEL quartz-halogen lamps for photometric standards 693
Y. Ohno and J. K. Jackson

Radiometric Applications

High-accuracy spectroradiometry of solar ultraviolet radiation 697
G. Seckmeyer, G. Bernhard, B. Mayer and R. Erb

Calibration of the broadband radiometers of the Finnish solar ultraviolet monitoring network 701
K. Leszczynski, K. Jokela, R. Visuri and L. Ylianttila

An ultraviolet-B/visible/near-infrared transfer radiometer 705
J. Urban and U. Leiterer

Resolution limits in radiation temperature measurements using unfiltered photodiodes as detectors 709
G. Andor

Influence of deviation from Lambertian reflectance on the effective emissivity of a cavity 713
Y. Ohwada

Method and installation for the measurement of laser radiant flux in the range 10 W to 50 W 717
M. Simionescu and F. Ionescu
